

Personal Portfolio Website

Updated Architecture & Real-Time Structural Screenshots Showcase

1. Project Overview

Designed and developed a fully responsive personal portfolio website to showcase skills, projects, certifications, and achievements. The website provides a clean user experience, modern UI, and easy navigation while reflecting expertise in Web Development, Digital Marketing, and Generative AI. Built with SpecKit for project planning and customized with clean HTML5, CSS3, and JavaScript.

2. Technologies & Tools Used

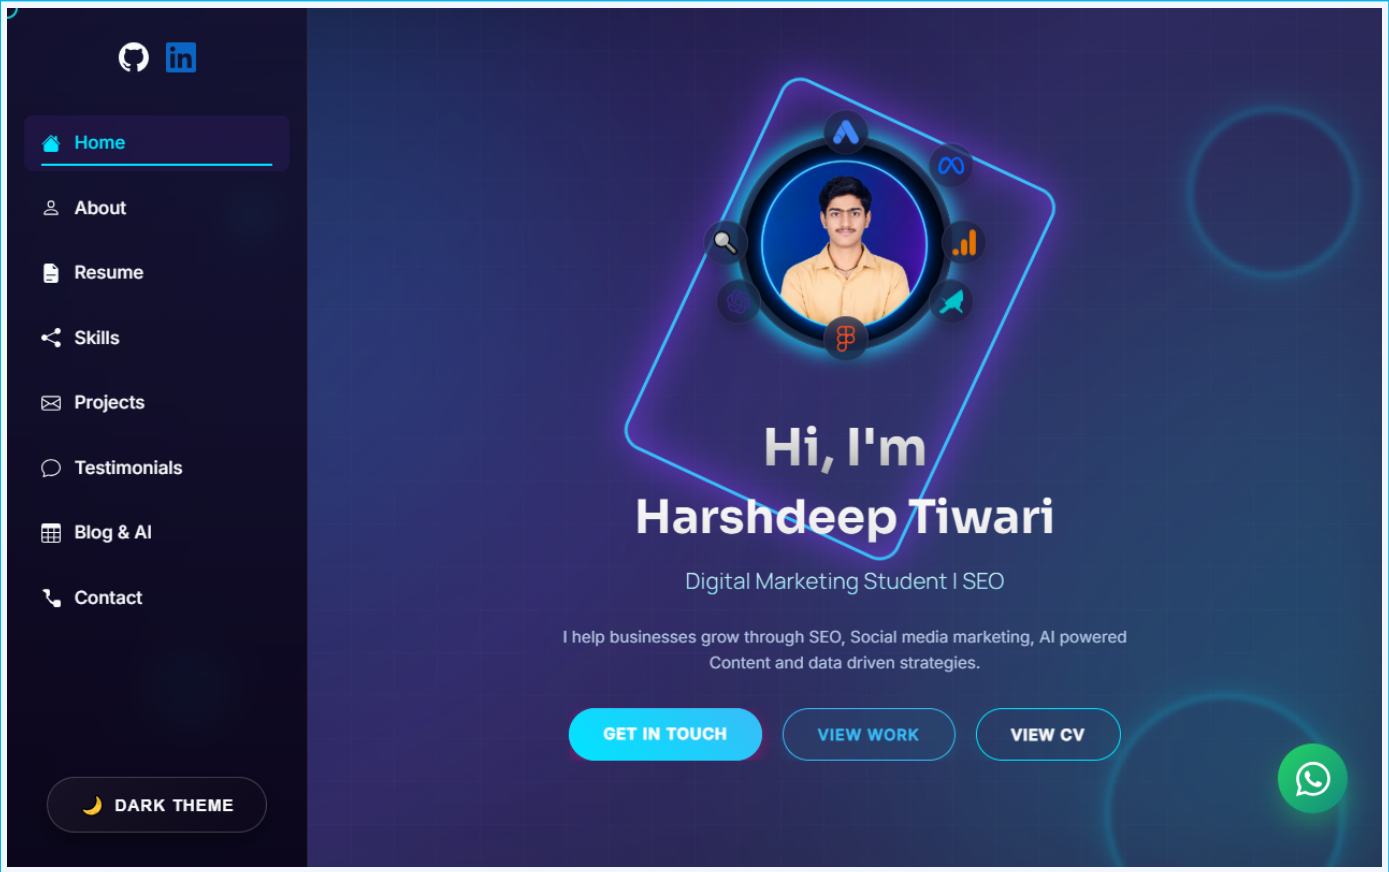

- SpecKit (Project Planning & Architecture)
- HTML5 (Semantic Layout & Accessibility)
- CSS3 (Vanilla CSS, Glassmorphism, Responsive Tokens)
- JavaScript (Dynamic Rendering, PDF Integration, Navigation)

3. Key Structural Enhancements

- Top-Aligned Profile Image Layout with Centered Typography
- Logo-based Skill Showcase across all categories
- Direct PDF Document & Asset Integration
- 100vh Viewport-Fitted Contact Interface (Zero Scroll)
- Clean Upright Dark & Light Theme Switcher

4. Technical Architecture

The website employs decoupled component styling, clean HTML templates, and modular JS handlers. All page snapshots below reflect the live, updated structural layout of the application.

About Me

Hello! I'm Harshdeep Tiwari

A passionate Web Developer with expertise in Digital Marketing, SEO, and Generative AI.

I believe that great design is not just about how things look, but how they feel and function. My journey in tech started with a curiosity for how the web works, which quickly evolved into a deep passion for crafting seamless, interactive, and visually stunning digital experiences.

I specialize in building responsive frontend architectures, designing intuitive user interfaces, and writing clean, maintainable code. Whether it's adding micro-animations or optimizing performance, I pay attention to the little details that make a big difference.
